solutions for
congestion
mitigation**

CMS
presents

An Information Session

Wed. December 5 — 7th Period (1:35 p.m. - 2:25 p.m.) — Location: Olin, Room 257

Join your fellow students at Rose-Hulman to explore graduate and internship opportunities in **TRANSPORTATION** engineering at the University of Florida Center for Multimodal Solutions for Congestion Mitigation (CMS).

CMS representatives will talk about the program and curriculum, participation in research projects, conferences, life as a graduate student, the latest state-of-the-art in transportation engineering and more. Information on CMS graduate research assistantship opportunities will be provided.

Students with an interest in traffic operations, vehicle detection, traffic signal control, safety, simulation, systems planning, network analysis and optimization, facilities design, and advanced computer applications will greatly benefit from attending this Information Session.

Free Food!

(Roly Poly Wraps – regular and vegetarian)
